

# Index

## *Introductory Note*

References such as '138–9' indicate (not necessarily continuous) discussion of a topic across a range of pages. Wherever possible in the case of topics with many references, these have either been divided into sub-topics or only the most significant discussions of the topic are listed. Because the entire volume is about 'agriculture' and the 'environment', the use of these terms (and certain others occurring throughout the work) as an entry point has been minimized. Information will be found under the corresponding detailed topics.

- abandonment 11, 60, 105, 148, 160, 164, 190
  - farm 55, 95, 110, 164, 167
