communication

- cross-functional 61–2
 - in disruption management 117–18
 - between operational/strategic levels 8–9
- compensation for passengers, regulation concerning 137–8
- completeness of data 81–2
- complexity of organisations 69–70, 98–103, **99, 101**
- Confidential Human Factors Incident Reporting Programme (CHIRP) 17–18
- congestion 65, 66
- Continental Airlines **48**, 109, 128
- control of operations 126
- coordination at industry-level 68
- cost cutting 60, 133–4, *134*
- cost of disruptions 74
 - aircraft damage 40
 - allocation to disruption events 41, *42*
 - borne by airlines and passengers 19
 - crew costs 40
 - current cost management 34, 35, 36–7
 - data on 79–80
 - defining 37–8
 - delta costs 38–41, 39
 - estimates of 34
 - handling charges 40
 - hired aircraft 41
 - lack of information on 13, 15, *16*
 - landing charges 40
 - passenger costs 40
 - punctuality costs 38, 39
 - revenue loss 41
 - route costs 39–40
- cost savings and cultural issues 151
- crews
 - cost of accommodation 79
 - costs 40
 - planning 54, 56, 127
 - safety implications of disruptions 64
 - shortages 149–50
- cross-functional communication 61–2
- culture, organisational 62–3, 118–19, 151
- damage to aircraft 40, 63, 85–6, 134–5, 157
- data
 - accessibility 78
 - accuracy 79–80, 81
 - accuracy of 91–2, **92**
 - capture 23–4, 26–7, 42–5, 45, 78–9
 - completeness of 81–2
 - identification of 77–8
 - input 80–1, 87
 - integration with sources of 87–8
 - links 81
 - maintenance and update of 77–8, 87
 - organisation of 77–83
 - quality of 78
 - technology and integration of 87–91
 - updating 80–1
- decision-making
 - as cause of disruption 53, 147–8
 - fast 57–8
 - on investment 55
 - and system knowledge of staff 59
 - using disruption loss management system 114–15, **115**
