

Index

- agency, 7–9, 12, 137–52, 146–8
 structure–agency debate, 137–52
- art of medicine, 10, 97, 120–21
- aorta implant surgery, 61–75
- authenticity, 140–41, 146–8
- autonomy, 10–12, 25, 39, 120, 131,
 137–52, 146–8
- biomedical,
 model, 109, 111, 119, 131, 137–52
 epistemology, 3, 4–5, 44, 56,
 reductionist, 120, 137–52
 boundary work, 155–70
 dominance, 108, 165–7
- body
 knowledge, 10, 15, 71, 77–93, 146–8,
 137–52
 medicalised, 137–52
- Broom, Alex, 97–112, 137–52
- cancer, 97–112
 understandings of, 137–52
 evidence, 137–52, 146–8, 149–50
- Cartesian dualism, 7
- Cochrane Collaboration, 2, 27, 29, 45, 156,
- childbirth, 156–7, 159
 evidence for, 164
 midwifery, 164–7
- clinical judgement, 4, 9–12, 36–8, 77–93,
 177
- clinical uncertainty, 9, 23–42, 77–93, 137–52
- clinical trial, 2, 8, 23, 27, 31, 97–112, 137–52
- complementary and alternative medicines,
 117–34
 evidence, 118–19, 120–21, 139, 149–50
 science, 123–6, 137–52
 epistemology, 117–34, 137–52
 clinical trials, 118–19, 120–21, 137–52
 subjective experiences, 137–52, 149–50
 clinician uncertainty, 117–34, 137–52
 cancer, 139, 149–50
- context,
 cultural, 13, 145, 186
 organisational, 14, 62, 100
- control, 28–29, 33, 80, 137–52, 146–8,
 149–50
- cultural beliefs, 97–112, 137–52
- doctors,
 responses to EBM, 117–34
 attitudes towards patients, 137–52
 attitudes towards midwives, 155–70
- decision making, 106–9, 110–18, 122,
 137–8, 142–6
- deskilling, 97–112, 104–6, 111, 178
- distinction, 106–10
- dualistic thought, 7, 117–34
- effectiveness, 3, 111, 97–112, 117–18,
 137–44, 178, 186
 cost, 4, 61, 178
- encoded knowledge, 6, 14, 77–93,
- epistemology, 2–3, 4–5, 8–9, 12–13, 44, 53,
 56, 97–112, 125, 139, 151–2
- ethnicity, 130
- evidence,
 as politics, 49–50, 97–112
 as empire, 44–5, 51–53, 56
 communal, 70–73, 77–93, 97–112
 in context, 77–93, 97–112
 misrepresentation, 163
 lay perspectives, 7, 38, 137–52, 142–6,
 146–8
 production, 97–112
 resistance, 3, 9, 11, 44–54, 117–34,
 137–52, 178
- evidence-based medicine (EBM), 1–19, 25,
 83–5, 97–99
 first-wave, 43–5, 47–9
 second-wave, 43–5

- as a social movement 1–4, 9–12 112, 131, 155, 167, 177
- resistance to, 97–112, 117–34, 137–52
- in relation to midwifery, 155–70
- evidence-based practice (EBP), 1, 8, 14, 43–60, 97–112, 120, 155, 178
- evidence-based patient choice, 7, 137–52
- evidence-based decision making, 97–112
- evidence-based maternity care, 155–70
- evidence-based nursing practice, 6, 99, 106, 97–112
- experiential knowledge, 11, 84, 149–50
- Foucault,
 - knowledge, 45–7, 49, 50
 - technologies of the self, 140–41
 - power, 49
- future research agenda, 177–88
- homebirth, 168–70
- hierarchy of evidence, 4–5, 44, 101–2, 107–8, 117
- biomedical, 97–112
- critique, 137–152
- histories of professions, 97–112, 155–70
- identity
 - work, 15, 140, 151,
 - professional, 105, 109, 112, 127–8, 155–70
- individualism, 8, 106, 137–52
- inter-professional differentiation, 14, 90, 102–4, 155, 185
- intuition, 9, 10–12, 82, 83, 90, 102–4, 137–52
- Jadad scale, 2, 4, 167
- judgement, 4, 9, 10–11, 37, 10–12, 77–93, 137–52, 177, 187
- knowledge,
 - embedded, 77–93
 - embodied, 10, 15, 71, 95–97, 77–93, 137–52
 - encoded, 14, 77–93
- legitimacy, 5–6, 97–112, 120–21, 137–52
- local universality, 97–112
- managerial culture, 97–112
- maternity care, 155–70
- media,
 - evidence, 124, 157–63, 164–6, 170
- medicalisation, 97–112, 155–70
- medical pluralism, 117–134, 137–52
- meta-analysis 2, 4–5, 27, 52, 136
- midwifery, 155–70
- neuro-rehabilitation, 77–93
- normative, 81
- nursing, 86, 93, 97–112
- oncology, 97–112, 137–52
- ontology, 9, 47, 97–112, 137–52, 186
- outcome measures, 77, 82–5, 86–7, 90, 92, 97–112, 167
- patient understandings, 7–9, 38, 137–52, 186–88
- Pedro scale, 2
- Polanyi, 77–93
- power, 2–4, 11, 12, 16, 23, 29, 33–38, 47–50, 111, 119–22, 137–52, 155–70, 185
- quality
 - evidence, 2, 9, 77–93, 97–112
 - scales, 77–93, 97–112
- randomised controlled trial (RCT), 23, 38, 73, 85, 117–123, 139, 167–8, 185–87
- critique, 97–112
- reflexivity, 140–41, 146–8
- Sackett, David, 1–2, 4, 170, 178, 181
- Science wars, 12
- Social movement, 10–11, 167–8
- social context, 34, 56, 97–112, 137–52
- social-constructionist perspective, 137–52
- standardisation, 23–41, 77–93, 97–112, 120–21, 137–52
- stratification, 13, 43–60, 167
- study designs, 97–112
 - analytical 4
 - epidemiological, 2, 4, 7, 10, 12, 13, 26, 29, 37, 44, 47, 51, 137, 185

- qualitative, 4, 43, 52, 77, 83–7, 91–2,
97–112, 142
interpretive, 4, 77, 108
surgery, 8, 11, 24, 61–8, 110, 149
systematic review, 4, 7, 26, 52, 118, 156,
168, 169
systematisation, 1, 6, 10, 44, 53, 97–112
- tacit knowledge, 63, 77–93, 97–112
trust in science, 149–50
- uncertainty, 28–33, 77–93, 97–112, 137–52
- war machines, 53–56
wellbeing, 140–41
