# Contents

*List of Figures*  
List of Tables  
About the Authors  
List of Abbreviations

1 **Introduction**  
   1 The Field of Human Factors  
   2 Objectives and Aims of the Book  
   3 Structure of the Book

2 **Modelling a Dynamic World**  
   1 Accident Causation Models  
   2 Runway Overrun at Bangkok (QF1)  
   3 Current Application of Human Factors in Aviation Accident Investigation  
   4 Incidents: A Tool for Proactive Safety  
   5 The Influence of Modern Technology  
Conclusions  
Summary

3 **A Complex Approach to a Complex Scenario**  
   1 Event Analysis of Systemic Teamwork (EAST)  
   2 The Kegworth Air Disaster  
   3 Data Gathering  
   4 Analysis of Networks  
   5 Implications for Further Work and Limitations  
Summary

4 **Development of a Study**  
   1 The Importance of Centralising Communication  
   2 Expanding on the Idea of ‘Ideal’ Networks  
   3 Statistical Analysis of Networks  
   4 Selection of a Suitable Metric  
Conclusions
5 Extending the Potential of Information Networks: A Bayesian Approach
   1 General Aviation: The ‘Unprofessional’ Genre? 107
   2 Investigating General Aviation Accidents 116
   3 Developing a Bayesian Information Network Approach 118
   4 Outcomes, Limitations and Future Work 128
   Summary 130

6 Can We Validate Networks Derived from Incident Data Through Simulation? A Pilot Study
   1 Can a Validation Approach be Validated? 131
   2 Methodology 136
   3 Results 144
   4 Other Results of Interest 153
   5 Discussion 154
   Summary 156

7 Incidents versus Accidents: An Industrial Study
   1 Safety Management Systems within Industry 159
   2 ‘They’ve Rebadged it you Fool!’ A Review of Best Practice in Aviation and Beyond 167
   3 Is Risk Really = Severity × Frequency? 175
   4 The ‘Distance from Disaster’ Model 178
   5 Discussion of the Benefits and Limitations of Working in Industry 190
   6 Conclusions and Further Work 193
   Summary 198

8 Conclusions
   1 Book Contribution 199
   2 Tying Together Several Aspects of the Book 201
   3 Developments and Directions for Future Work 208
   4 Closing Remarks 209
