**Airline Finance**
FOURTH EDITION
Peter S. Morrell, Air Transport Economics and Planning, UK

‘The book strikes the right balance between the practical and technical financial elements, incorporating a range of aviation examples (often via useful box case studies) as well as hypothetical work through examples. All in all, it provided me with some very useful insights into airline finance, both in terms of the detailed airline financial calculations required and the bigger aviation issues that impact upon financial decision-making.’ Journal of Transport Geography

Thoroughly amended and updated throughout, the fourth edition reflects the many developments that have affected the industry, with a particular emphasis on the full impact of the global banking and sovereign debt crises. This edition also features new material discussing the increased airline mergers and acquisitions (M&A) activity of recent years, and considers the likelihood of further consolidation in the future.

**Foundations of Aviation Law**
Michael W. Pearson, Arizona State University, USA and Daniel S. Riley

‘Foundations of Aviation Law is an excellent broad based primer on aviation law. It is both substantive and instructive for an aviation specialist and any practitioner facing issues related to aviation law. An excellent resource tool.’ Patrick J. McGroder III

Foundations of Aviation Law is an easy-reading general primer into the often complex world of aviation law, written for aviation students as well as legal professionals who are looking for broad-based, introductory coverage of the subject. The book is divided into six general categories, with fifteen relevant sub-chapters, allowing focused learning into particular areas of law. Throughout it features chapter summaries, key word indices and review questions. The design easily allows instructors to develop syllabi that spotlight the specific area of law that they are interested in exploring, providing comprehensive coverage of both traditional introductory legal concepts and topical aviation subject matter.

Buying the Big Jets
Fleet Planning for Airlines
SECOND EDITION
Paul Clark, Managing Director, Through The Looking Glass, Canada and UK
Selecting the right aircraft for an airline operation is a vastly complex process, involving a multitude of skills and considerable knowledge of the business. Buying The Big Jets was first published in 2001 to provide guidance to those involved in aircraft selection strategies. This Second Edition brings the picture fully up to date, incorporating new discussion on the strategies of low-cost carriers, and the significance of the aircraft cabin for long-haul operations. Latest developments in aircraft products are covered and there are fresh examples of best practice in airline fleet planning techniques.
