

Visualizing Medieval Medicine and Natural History, 1200-1550

Edited by Jean A. Givens, University of Connecticut, USA, Karen M. Reeds, Princeton Research Forum/National Coalition of Independent Scholars, USA and Alain Touwaide, Smithsonian Institution, National Museum of Natural History, USA

AVISTA Studies in the History of Medieval Technology, Science and Art: 5

October 2006

234 x 156 mm

300 pages

Hardback

978-0-7546-5296-0

\$150.00

Includes 52 b&w illustrations

Images in medieval and early modern treatises on medicine, pharmacy, and natural history often confound our expectations about the functions of medical and scientific illustrations. They do not look very much like the things they purport to portray; and their actual usefulness in everyday medical practice or teaching is not obvious.

By looking at works as diverse as herbals, jewellery, surgery manuals, lay health guides, cinquecento paintings, manuscripts of Pliny's Natural History, and Leonardo's notebooks, *Visualizing Medieval Medicine and Natural History, 1200-1550* addresses fundamental questions about the interplay of art and science from the thirteenth to the mid-sixteenth century: What counts as a medical illustration in the Middle Ages? What are the purposes and audiences of the illustrations in medieval medical, pharmaceutical, and natural history texts? How are images used to clarify, expand, authenticate, and replace these texts? How do images of natural objects, observed phenomena, and theoretical concepts amplify texts and convey complex cultural attitudes? What features lead us to regard some of these images as typically 'medieval' while other exactly contemporary images strike us as 'Renaissance' or 'early modern' in character?

Art historians, medical historians, historians of science, and specialists in manuscripts and early printed books will welcome this wide-ranging, interdisciplinary examination of the role of visualization in early scientific inquiry.

Contents

Introduction, Jean A. Givens, Karen M. Reeds, Alain Touwaide; Image, word and medicine in the Middle Ages, Peter Murray Jones; Latin crusaders, Byzantine herbals, Alain Touwaide; The illuminated Tacuinum sanitatis manuscripts from northern Italy ca. 1380-1400: sources, patrons, and the creation of a new pictorial genre, Cathleen Hoeniger; Erudition on display: the 'scientific' illustrations in Pico della Mirandola's manuscript of Pliny the Elder's Natural History, Sarah Blake McHam; Reading and writing the illustrated Tractatus de herbis, 1280-1526, Jean A. Givens; Leonardo da Vinci's anatomical studies in Milan: a re-examination of sites and sources, Monica Azzolini; (Hu)moral exemplars: type and temperament in cinquecento painting, Piers D. Britton; Leonardo da Vinci and botanical illustration: nature prints, drawings, and woodcuts ca. 1500, Karen M. Reeds; The uses of realism in early modern illustrated botany, Claudia Swan; Index.

About the Editor

Jean A. Givens is Associate Professor in History of Art at the University of Connecticut, Storrs, Connecticut, USA. Karen M. Reeds is an independent scholar in Princeton, New Jersey, USA, affiliated with the Princeton Research Forum and the National Coalition of Independent Scholars. Alain Touwaide is Historian of Sciences at the National Museum of Natural History at the Smithsonian Institution, Washington DC, USA
