234 x 156 mm  
Hardback  
£60.00

Providing case study analyses of the politics of science in and around the International Polar Year of 2007-2008, this volume makes a distinct contribution to ongoing research focusing on the relationship between science, international politics, law and history. The contributors combine both interdisciplinary and multi-theoretical approaches to engage directly with the most recent debates in international relations scholarship, to include discussions of arctic climate change, governance issues, reflections on the Antarctic Treaty and the science-geopolitics interface amongst others. This is the first comprehensive account to look explicitly at the relationship between global politics and science through an account of the International Polar Years.

## Contents

Preface: legacies of polar science, Michael Bravo; Introduction, Jessica M. Shadian and Monica Tennberg; Part I Whose Arctic? Constructing Arctic Politics Through Claims of Knowledge: A changing Arctic climate: more than just weather, Annika E. Nilsson; Revisiting politics and science in the Poles: IPY and the governance of science post-Westphalia, Jessica M. Shadian; Science, cooperation and conflict in the Polar region, Rob Huebert; IPY field stations: functions and meanings, Urban Wråkberg. Part II Whose Environment? Science and Politics in Antarctica: Antarctic science, politics and IPY legacies, Julia Jabour and Marcus Howard; The IPY and the Antarctic Treaty system: reflections 50 years later, Donald R. Rothwell; The formation and context of the Chilean Antarctic mentality from the colonial era through the IGY, Consuelo León Woppke; Biological prospecting in the Southern Polar region: science-geopolitics interface, Sanjay Chaturvedi; Three spirals of power/knowledge: scientific laboratories, environmental panopticons and emerging biopolitics, Monica Tennberg; Index.

## About the Editor

Jessica Shadian is a Senior Researcher at the High North Center for Business and Governance, Bodo Graduate School for Business, Norway

Monica Tennberg is Research Professor at the Arctic Centre, University of Lapland, Finland.
