New Frontiers in Microsimulation Modelling

Edited by Asghar Zaidi, Ann Harding and Paul Williamson

Public Policy and Social Welfare

October 2009

640 pages

978-0-7546-7647-8

includes 96 figures and 127 tables

In the past fifteen years, microsimulation models have become firmly established as vital tools for analysis of the distributional impact of changes in governmental programmes. Across Europe, the US, Canada and Australia, microsimulation models are used extensively to assess who are the winners and losers from proposed policy reforms; this is now expanding into new frontiers, both geographically and in terms of policy areas. With contributions from more than 60 international experts, this volume offers a comprehensive introduction to the state of microsimulation internationally, illustrating a wide range of new applications and approaches. It will be of relevance to government policy makers, social policy planners, economists and those concerned with predicting the impact of public policy change and to academics in a variety of disciplines, especially social and public policy, human geography, development studies and economics.

Asghar Zaidi is Director of Research at the European Centre for Social Welfare Policy and Research, Vienna, Austria and Senior Economist in the Social Policy Division of the Directorate of Employment, Labour and Social Affairs, at the Organization for Economic Co-operation and Development (OECD), Paris, France. He has previously worked as an Economic Advisor to the British government's Department for Work and Pensions and he contributed to the government's dynamic microsimulation model, PENSIM II. He is Vice President of the International Microsimulation Association.

Ann Harding is Professor of Applied Economics and Social Policy and Director of National Centre for Social and Economic Modelling (NATSEM) at the University of Canberra, Australia. She is an internationally recognised expert in the fields of microsimulation modelling, income distribution and tax/transfer policy, with four published books in the field, and experience of working on major policy reviews in several Federal government departments. She is a Fellow of the Academy of Social Sciences and has been President of the International Microsimulation Association since 2003.

Paul Williamson is Senior Lecturer in Geography at the University of Liverpool, UK. He is the editor of the International Journal of Microsimulation.
