234 x 156 mm  
Hardback  
£65.00

The regulation of the body provides an important concern in law, medical practice and culture. This volume contributes to existing research in the area by encouraging experts from a range of related disciplines to consider the legal, cultural and medical ways in which we regulate the body, further exploring how conceptions of self, liberalism, property and harm inform and influence contentious legal and ethical questions about what we can and cannot do to or with our own bodies.

## Contents

Preface; Introduction - being human: of liberty and privilege, Margaret Brazier; Part I Regulating Reproduction: Introduction to part I, Helen Beebee; Nothing and not-nothing: law's ambivalent response to transformation and transgression at the beginning of life, Mary Ford; Regulating reproduction: frozen embryos, consent, welfare and the equality myth, Sonia Harris-Short; Persons and their parts: new reproductive technologies and risks of commodification, Heather Widdows.
