Business travel has become indispensable to the global economy, not only due to its necessity in the maintaining of corporate networks, but also because of the associated economies that cater to the daily requirements of the business traveller. Underlying these developments are concerns over the environmental impact of increasing air travel, which are likely to generate new challenges for the future of business travel.

From a team of international experts comes this analysis of the role, nature and effects of modern business travel. Issues addressed include the relationships between airlines and business travellers, the role of mobility in business, and the opportunities and challenges created by mobile workforces. The study combines theoretical advances with comprehensive analysis, and will provoke debate across the social sciences on the nature, organization and space of work in the twenty-first century.

Contents

Foreword: business travel in the global economy, Brian Graham; International business travel and the global economy: setting the context, Jonathan V. Beaverstock, Ben Derudder, James Faulconbridge and Frank Witlox; Part 1 Geographies and Modes of Business Travel: A people set apart: the spatial development of airline business class services, John T. Bowen Jr; Geographies of business air travel in Europe, Ben Derudder, Lomme Devriendt, Nathalie van Nuffel and Frank Witlox; 'Official' and 'unofficial' measurements of international business travel to and from the United Kingdom: trends, patterns and limitations, Jonathan V. Beaverstock and James Faulconbridge; The 'bizjet set': business aviation and the social geographies of private flight, Lucy Budd and Phil Hubbard.
